ATS

Automatic Transmission Supplement
with soluble Molybdenum

Performance

Mollyslip Automatic Transmission Supplement is a soluble molybdenum fortified supplement for use in automatic transmissions, limited slip differentials, wet-clutch systems and over-drive units that are actuated by friction clutches. The results are:

- Improved lubrication of pump, valves and clutches
- Smoother shifting
- Reduced heat by reducing frictional losses
- Reduced fuel consumption through reduced slippage
- Reduced maintenance costs

Mollyslip Automatic Transmission Supplement Is

Mollyslip Automatic Transmission Supplement has an extremely high film strength. It is a soluble molybdenum fortified supplement with corrosion inhibitors and anti-foam agents to improve the performance of automatic transmission fluids.

Applications

Use in automatic transmissions, limited-slip differentials, power-steering units, and wet clutch systems (usually found only on motorcycles and ATV's). Use in all drives that recommend any type of automatic transmission fluid. Mollyslip ATS is recommended by transmission shops and builders of racing transmissions.

How Often Should Mollyslip Automatic Transmission Supplement Be Added?

Each time the automatic transmission or limited slip differential fluids are changed, add 5% - 10% Automatic Transmission Supplement to the make-up fluid. Check your vehicle owner's manual for the manufacturer's recommendations. For long, trouble-free service, use the values listed for severe service. When possible, pre-mix the Automatic Transmission Supplement with the automatic transmission fluid. Where this is not possible, ensure the automatic transmission fluid is at operating temperature before adding the Mollyslip Automatic Transmission Supplement.

Packaging

Mollyslip ATS Automatic Transmission Supplement is available in:

Product No.	Packaging	Case Size
5932	225 mL (7.6 U.S. fl. oz.) boxed tube	Case of 12
5935	1 L (1 U.S. qt.) bottle	Case of 12
5936	4 L (1 U.S. gal.) jug	Case of 4
5937	23 L (6 U.S. gal.) pail	
5939	205 L (54 U.S. gal.) drums	

(See Material Safety Data Sheet for proper first aid instructions.)
