

MOLYSLIP COPASLIP

Anti-Seize Compound

Molyslip Copaslip
Part # 3473 454g

Molyslip Copaslip is a highly effective anti-seize compound that is used throughout the world in industrial, automotive and marine applications.

Copaslip features

- To ensure long-lasting effectiveness, Copaslip is formulated to not harden or soften under extreme temperature and operating conditions
- Has a very wide operating range from -40°C to +1100°C (-35°F to +2000°F) especially designed for extreme service conditions
- Prevents metal-to-metal contact to increase reliability and component life
- Provides permanent protection against rust and corrosion

Molyslip Copaslip is the perfect choice for heavy duty industrial, automotive and marine applications.

Why Copaslip will work for you:

As part of the transportation industry your equipment will be operating in numerous adverse environmental conditions such as high humidity and salinity, extreme pressure, or excessive temperatures. In these conditions metals can fuse or weld together.

The cause of the problem is corrosion, particularly in the warm, wet and salty conditions that are consistent with Canadian winters and spring.

Copaslip is designed to provide an insulating layer between metals so that dismantling and routine maintenance are free from breakage of fused parts. This problem is especially onerous on threads and shackles. The result is reduced maintenance time and elimination of damaged components.

A single application of Copaslip will stop metal fusion for years.

COPASLIP is part of the Molyslip family of specialty lubricants

- AS/40 and AS/65 assembly pastes
- engine, hydraulic and gear oil supplements
- high temp grease
- multi-purpose grease
- ultra-5 extreme duty grease
- diesel fuel conditioner
- combat penetrating oil
- moly spray grease
- open gear spray
- air drying moly spray
