

ONTARIO LEGENDS RACING

TRIBOSPEC / SUNOCO ONTARIO LEGENDS SERIES

Bill Mason's Racing Highlights

July 16, 2005 - Mosport Speedway

With rain threatening, the #4 legends car started the first heat race outside pole taking the greenflag in the lead. THE THROTTLE CABLE BREAKS! With the entire field narrowly missing a potential disaster, I pitted and watched as a for sure podium finish vanishes. My fault as I should have used Molyslip Liquid Grease on the cable!

Starting dead last on the outside last row, I took a deep breath and gunned it, knowing the engine was about to get some serious abuse. Carving through the field, I was holding the engine on the rev limit A LONG TIME!

After a caution free 20 laps I finished a hard won 6th place, with 5th and 4th within reach and not enough laps to catch them. In 30 degree heat, some cars had power loss and visible smoke while the MOLYSLIP #4 car ran perfectly, ready for more. Thanks and see you at the races.
