

# PRODUCT OVERVIEW

Product Name	Category	Detail
E Oil Supplement	Oil Supplement	<ul style="list-style-type: none"> <li>Suspended 0.5 micron particles in oil solution with additive package that blends with all leading motor oils including synthetics</li> <li>Provides friction-reducing barrier plates onto internal components and does not drain off</li> <li>Gives significant performance improvements</li> </ul>
G Gear Oil/Manual Transmission Supplement	Oil Supplement	<ul style="list-style-type: none"> <li>Micronized MoS<sub>2</sub> in a high quality multi-viscosity gear oil</li> <li>Contains anti-foam and adhesion additives</li> <li>Plates to gear surfaces providing seamless gear shifts reducing load on equipment</li> </ul>
Automatic Transmission Supplement	Oil Supplement	<ul style="list-style-type: none"> <li>Organic molybdenum that does not reduce friction as it is necessary for the drive to produce motion</li> <li>Improves the film strength of the fluid</li> <li>Reduces heat and slippage in the transmission</li> </ul>
Break-In	Oil Supplement	<ul style="list-style-type: none"> <li>Designed as oil additive for new/rebuilt engines</li> <li>Will not prolong break-in period</li> <li>Allows metal high points to be flattened rather than fusing together and breaking away</li> </ul>
Diesel Fuel Conditioner	Fuel Additive	<ul style="list-style-type: none"> <li>Protects fuel system from tank to exhaust against attack from acids and rust</li> <li>Lubricates fuel pumps and injectors</li> <li>Prevents the formation of lacquer, gums and carbon deposits</li> </ul>
Tuneslip Fuel Injector Cleaner	Fuel Additive	<ul style="list-style-type: none"> <li>Keeps fuel injectors clean</li> <li>Promotes complete combustion</li> </ul>
Multi-Purpose Grease	Grease	<ul style="list-style-type: none"> <li>EP grease with MoS<sub>2</sub> to minimize the effects of high loads (in excess of 140,000 psi)</li> <li>Water proof grease with a bentonite clay base</li> <li>Non-melt formula remains effective at up to 218°C</li> </ul>
High Temperature Bearing Grease	Grease	<ul style="list-style-type: none"> <li>Exceptional mechanical and thermal stability</li> <li>Calcium complex base allows reforming ability of grease</li> <li>Gives significant performance improvements</li> </ul>
Open Gear Lube	Grease	<ul style="list-style-type: none"> <li>Non-melt, bentone based grease</li> <li>Contains oxidation and rust inhibitors, plus adhesion additives</li> <li>EP properties of molybdenum disulfide and graphite ensuring low starting torque</li> </ul>

<b>Product Name</b>	<b>Category</b>	<b>Detail</b>
Copaslip Anti-Seize Compound	Anti-Seize	<ul style="list-style-type: none"> <li>• Extreme operating temperature range, sub-zero to 1100°C</li> <li>• Prevents metal-to-metal contact under all likely conditions</li> <li>• Highly effective corrosion inhibitors provide permanent protection against rusting and corrosion</li> </ul>
AS/40 Assembly Compound	Assembly	<ul style="list-style-type: none"> <li>• Contains 40% MoS<sub>2</sub> in a bentone base</li> <li>• Effective against high loads and prevents galling and corrosion</li> </ul>
AS/65 Assembly Compound	Assembly	<ul style="list-style-type: none"> <li>• Essentially the same product as AS/40 with a 65% MoS<sub>2</sub> content</li> </ul>
Darda Grease (40% MoS <sub>2</sub> )	Private Label	<ul style="list-style-type: none"> <li>• Essentially the same product as AS/40 with custom packaging for Demolition Equipment who manufacture rock splitting equipment</li> <li>• Darda grease is required to be used on all equipment rented or sold in order to maintain the warranty's offered by Demolition Equipment</li> </ul>
Darda Light (20% MoS <sub>2</sub> )	Private Label	<ul style="list-style-type: none"> <li>• Similar to Darda Grease but blended with Multi-Purpose grease to produce a product with a strong additive package and a lower MoS<sub>2</sub> content</li> </ul>
Molyslip Liquid Grease	Aerosol	<ul style="list-style-type: none"> <li>• All-purpose fluid grease containing MoS<sub>2</sub> in aerosol</li> <li>• Combines the advantages of a solid lubricant with the penetrating properties of a liquid</li> </ul>
Molyslip Chain Lube	Aerosol	<ul style="list-style-type: none"> <li>• Same product as Liquid Grease with different packaging marketed to the enthusiast (i.e. dirt bike and motorcycle owners, ATV owners etc.)</li> </ul>
Combat Penetrating/Lubricating Oil	Aerosol	<ul style="list-style-type: none"> <li>• Penetrates and releases seized components</li> <li>• Displaces moisture to effectively dry electrical systems</li> <li>• Harmless to rubber, plastic, fabric and other common surfaces</li> </ul>
Open Gear Spray	Aerosol	<ul style="list-style-type: none"> <li>• Heavy duty lubricant designed to adhere to most surfaces providing firm lubrication film</li> <li>• Exceptional resistance to salt water and corrosion</li> </ul>
ADF Air Drying Film	Aerosol	<ul style="list-style-type: none"> <li>• Suspended micronized particles of MoS<sub>2</sub> in an isopropyl alcohol solution that dries rapidly leaving a dry film of MoS<sub>2</sub>.</li> </ul>
Moly (MoS <sub>2</sub> ) Powder	Powder	<ul style="list-style-type: none"> <li>• Particles of pure MoS<sub>2</sub></li> <li>• Used in wire-draw mechanisms to allow metal components to be manipulated cold without welding or pickup</li> </ul>
