

MOLYSLIP ATS

Automatic Transmission Supplement

Molyslip ATS
Part #5935 1L

Automatic Transmission Supplement

is part of the Molyslip family of specialty lubricants

- AS/40 and AS/65 assembly pastes
- engine, hydraulic and gear oil supplements
- Copaslip anti-sieze compound
- high temp grease
- multi-purpose grease
- ultra-5 extreme duty grease
- diesel fuel conditioner
- combat penetrating oil
- moly spray grease
- open gear spray
- air drying moly spray

Molyslip Automatic Transmission Supplement

(ATS) is a soluble molybdenum-fortified supplement with corrosion inhibitors and anti-foam agents that:

- Increases the film strength of your fluid
- Improves the lubrication of pumps, valves and clutches
- Reduces slippage
- Reduces heat and friction
- Protects transmission components
- Blends with automatic transmission and power steering fluids, engine and gear oils

Benefits of using Molyslip ATS:

Reduces Downtime – Costs associated with equipment downtime include lost revenue, emergency service calls and emergency parts replacement, among others. Using Molyslip ATS ensures an extremely high film strength that will leave your components protected. ATS also reduces slippage and fluid heat buildup, a common cause of transmission failure.

Extends Component Life – Ongoing use of Molyslip ATS ensures that the protection of soluble molybdenum is always in effect. Heat and wear are significantly reduced. Less heat and wear means longer component life.

Aids in Assembly – Use of Molyslip ATS is an effective assembly lube when building or rebuilding transmissions. Installing pistons is much easier and pinched, leaking lipseals are non-existent when ATS is used. Pre-lubing bushings and seal rings will also prevent damage during initial start-up.
