

MOLYSLIP HTBG

High Temperature Bearing Grease

Molyslip High-Temperature
Bearing Grease
Part #3460 400g

HIGH TEMPERATURE BEARING GREASE

is part of the Molyslip family
of specialty lubricants

- AS/40 and AS/65 assembly pastes
- engine, hydraulic and gear oil supplements
- Copaslip anti-sieze compound
- multi-purpose grease
- moly spray grease
- diesel fuel conditioner
- combat penetrating oil
- open gear spray
- air drying moly spray

Molyslip High Temperature Bearing Grease (HTBG) is a high performance moly grease specially formulated for high temperature applications. HTBG combines:

- Extreme pressure properties
- Corrosion inhibiting additives
- Molybdenum disulfide
- Excellent water resistance properties

HTBG's performance providing capabilities:

Molyslip **High Temperature Bearing Grease** is a high performance moly grease designed for a variety of automotive and industrial applications.

HTBG's unique formula enables effective operation in temperature conditions ranging from -40°C to 163°C (-40°F to 325°F) with intermittent use up to 299°C (570°F).

In addition to these high temperature capabilities **HTBG** uses a modified calcium complex which gives it exceptional mechanical and thermal stability.

In fact even after exceeding its temperature limitations Molyslip **HTBG** is designed to return to it's original state upon returning to operating temperatures.

Excellent for:

- Conveyor bearings for heat-treat furnaces
- Electric motor bearings
- Steel mill roller bearings
- Low and high-speed journal bearings
- Good wire rope dressing for high humidity or alkaline conditions
