Dear Steve:

Thank you for making it possible to dyno test my 2009 Jeep Grand Cherokee SRT8 today at Rocket Rally here in Squamish. Although I have been using Molyslip E oil supplement in my vehicles for many years for its protective qualities such as cold starting, I had not yet started to use it in my Jeep. Needless to say, I was astounded by the dyno results when we added the Molyslip to my engine. A 10 hp gain & a 10 ft lb gain in torque was amazing! You can be sure I'll be sharing these results with my friends who were unable to attend.

As far as I'm concerned, this product should be in everyone's engines for its protective qualities as well as increased performance by reducing friction.

Thank you again for an incredibly fun and informative afternoon.

Sincerely,

Ron Sloan
Account Executive
