August, 9, 2010

To Molyslip,

This letter is to thank Molyslip for your sponsorship of the Molyslip products. We are currently using the oil additives in three of our Ontario Challenge Cup, and Castrol Touring Car racing cars, and we are more than completely satisfied with the performance gains, life and overall quality of the product.

The past two seasons we raced the complete 8 weekend season and a three hour endurance race at Mosport International Raceway, and with Molyslip additives in the engine, gearbox and differential, the cars ran the season and the full three hour race, with no mechanical problems. RMP Motors Competizione will be using Molyslip additives in all our race, street, and personal cars from now on.

We noticed a 5hp gain on our BMW 330i Racing cars, and 11hp on our GT1 TR8 at the dyno.

We also use Molyslip brand of additives in all of our oil services at RMP Motors, in many different makes and models such as BMW, Mercedes, Audi, Ferrari and Porsche.

Molyslip is the ONLY additive we now use.

Sincerely,

Rocco Marciello

Rocco Marciello
