

# MOLYSLIP SILICONE LUBE

## Silicone Brake Lube & Sealant

Molyslip Silicone Lube  
Part # 5252 170g silicone tube

**Molyslip Silicone Lube** is a highly stable synthetic silicone lubricant and sealant with excellent water washout characteristics and dielectric properties.

### Key Features:

- Superior moisture barrier capabilities
- Resistant to a wide range of chemicals, acids & alkalis
- Possesses superior rubber lubrication and sealing properties
  - will not swell most rubbers, safe for O-rings and plastics
- Electrically insulating with good dielectric properties
- Wide serviceable temperature range -40 to 204°C (400°F)

### Why Silicone Lube will work for you:

**Automotive:** Molyslip Silicone Lube is an ideal lubricant for brake caliper slides and boosters as well as rubber O-rings and plastic parts. It prevents sticking and corrosion of caliper pins while its superior moisture barrier capabilities helps seal boots. These properties also make it effective for lubricating door and sunroof gaskets.

Additionally Silicone Lube can be used effectively on O-rings to prevent drying, cracking or becoming brittle even in harsh environments.

**Electrical:** In addition to being ideal for use on brake parts, Silicone Lube is also excellent for use as an electrical insulator. Its dielectrical properties make it suitable on high voltage and underground connections and as a damping medium for dash pots in electrical equipment.

### Additional uses include:

- as a sealant for gaskets, seals, vacuum and pressure systems, particularly outdoor and marine applications
- on water softener and faucet valves
- as a mold release where high temperature molds have a tendency to stick to dies and plates

*Put this cost-effective lubricant to the test today! Contact your Molyslip representative for more information and where to buy.*

**SILICONE LUBE** is part of the Molyslip family of specialty lubricants

- Air Drying Film
- AS/40 and AS/65 Paste
- ATS and MTS for transmissions
- CAS-100 Ceramic Anti-Seize
- Chain Lube
- Copaslip Anti-Seize Compound
- E Oil Supplement for engines and hydraulics
- G Gear Oil Supplement for gear drives
- High Temp Bearing Grease
- Liquid Grease
- Multi-Purpose Grease
- Moly Powder
- Molytec 40 Silicone Moly Paste
- Open Gear Spray
- Tuneslip Injector Cleaner
